

NNDC INDIA FOUNDATION

(National Network of Depression Centers)

North India's first Behavioral Health Training Program, exclusively conducted by NNDC-IF.

NNDC-IF's Behavioral Health Training Program (BHTP) was recently implemented in New Delhi. Two comprehensive training sessions were conducted for the Pranab Mukherji Foundation and Read India. The sessions consisted of Mental Health First Aid (MHFA) training, which helps participants recognize different mental health problems, and equips them to provide timely help. The participants were school teachers, principals, and local representatives from villages near Delhi. The participants found the sessions extremely useful, informative, and interactive.

NNDC-IF's mission is to improve conditions for those suffering from mental illness in India. To accomplish this mission, NNDC-IF is offering its exclusive BHT Program to corporations, educational institutions, government and non-governmental organizations, hospitals, and anyone else who feels the need to train their personnel in mental health first aid. To book a BHTP session, please call Dr. Hina Sharma at +91-(112)-461-5383.
